

FROM STRATEGY TO DELIVERY

26th and 27th April
Golden Lion Hotel
8-10 King Street
Stirling
FK8 1BD

Join us at this pivotal time in the local energy sector – we want to hear from you! Our two day event explores the Scottish Government's aims and ambitions of the current draft Energy Strategy, and how we can help achieve these at a local energy level. *We've designed the agenda to be as flexible as possible; you are welcome to attend just one or both days.*

Day one: Focusing on the Strategy.

We are delighted to be joined by **Paul Wheelhouse, Minister for Business, Innovation and Energy**, who will be delivering our keynote speech, and we will hear from a number of successful energy projects.

Our breakout sessions will give you the chance to consider issues, questions, challenges and opportunities laid out in the Strategy.

The day will close with our expert panel discussion, featuring a presentation from Chris Stark, the Scottish Government's Director of Energy and Climate Change.

We hope you can join us for the conference dinner, sponsored by SSEN, where you can mull over the day's discussions in an informal environment.

Day two: Delivering Projects

Day two focuses on the nitty gritty of projects, and discussing topics in depth. We've split workshops into three suggested streams, but you can select your workshops as you wish.

The first stream explores shared ownership; the support available to deliver, alignment with the planning system and how to make the most of funds received from revenue-generating community energy projects.

The second and third streams start with a session on Scottish Government support for local energy projects. You can then attend one of two workstreams:

- Starting a project – design and commercialisation, or
- Delivering a project already underway – managing contractors and communications.

We look forward to seeing you there!

Our thanks go to the Scottish Government and our sponsors for kindly supporting the CARES conference – SSEN and Friends of the Earth.
